DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 3-7, 9-14, 16, 18-21, 23, 25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Magnante '204.

Magnante discloses non-coherent optical sources are preferred; however, one of ordinary skill in the art would have found it obvious to use a coherent source because Magnante teaches source 1 can be a laser diode. The Examiner is interpreting elements 3-9 of Magnante to comprise a beam modification device and imaging device 20 to comprise a wavefront analyzer. One of ordinary skill in the art would have found it obvious to provide a topography analyzer unit to the wavefront analyzer device because the deviations of the focal spots from the microlens axes show wavefront slope error and provide the needed information to form a topographic image.

Allowable Subject Matter

2. Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
